## *The Goodyear Tire & Rubber Company*

*of Canada, Limited*

---

Toronto, October 26th, 1925.

### To The Shareholders:

The financial position of your Company, as of September 30th, 1925 and the results from operations for the past fiscal year are set out in the accompanying Audited Balance Sheet.

After providing for all manufacturing, selling and administrating expenses and income taxes, the profits for the year are \$1,462,852.25. Out of this amount we have set aside \$413,411.88 for depreciation of buildings, plant and equipment, leaving a net profit of \$1,049,440.37. The Export profits for the months of August and September have not been included in the above amounts. These profits are much in excess of the profits of the corresponding months of a year ago. The distribution of the profits for the year is as follows:

Addition to plant and equipment	\$453,080.01
Paid deferred dividends on	
Preferred Stock	157,500.00
Paid current dividends on Prior	
Preference and Preferred Stocks	521,988.00
Increased working capital	330,284.24

The Company has no indebtedness, except current bills not due for discount. It has a net working capital of \$5,205,075.58 and a surplus of \$2,127,148.30.

The Company's profits for the year were \$211,705.95 in excess of the profits of the preceding year. Cash on hand, as of September 30th, was \$948,062.84.

MAY 24-32 ATIS HG

As compared with a year ago the statement shows a material reduction in cash with a corresponding increase in inventories and accounts receivable. This change is due to two causes: first—the material increase in the volume of business, second—the almost unprecedented increase in the price of crude rubber, which increase not only effects the stock of crude rubber on hand, but goods in process, finished stock and accounts receivable.

During the year we have written \$206,884.89 off our plant equipment. In addition to this we have a reserve account of \$2,120,957.78 to provide for depreciation of buildings, plant and equipment. We are carrying a reserve of \$70,383.75 for bad debts, and a special reserve of \$175,311.87. These reserves are more than adequate to cover any contingency that may arise.

The rubber market during our past fiscal year has been very unusual, prices have risen from in the neighborhood of about 27c. to high point of \$1.26 per pound, and at the close of the fiscal year crepe spot rubber was selling at 96c. per pound. Your Company is covered for quite some time on crude rubber at very much lower than the prevailing prices. Other provisions have been made to safeguard the Company against fluctuations in crude materials.

Our sales are so divided between Export and Domestic business that it permits a constant operation of the plant at its maximum capacity throughout the year. This has a material effect on reducing our overhead. For the past year the prices on Canadian rubber goods have been very disappointing. During most of the year tires were sold as low as or at a lower price than tires of the same kind and quality were being sold in the United States.

The Canadian rubber industry is in a more stabilized and promising condition to-day than it has been for some time. We see no reason why our present fiscal year's business should not be as profitable or more profitable than the year just closed.

Respectfully yours,

C. H. CARLISLE,

Vice-President and General Manager.

October 26th, 1925.

To the Shareholders of

## THE GOODYEAR TIRE & RUBBER COMPANY OF CANADA, LIMITED

We have examined the books and accounts of The Goodyear Tire and Rubber Company of Canada, Limited for the year ending 30th September, 1925.

We have satisfied ourselves that all charges to Property Accounts are in respect of actual additions, and sufficient provision has been made for accruing depreciation. The stocks on hand have been taken and valued by the Company at prices not in excess of cost or market; the bad debt reserve is considered sufficient to provide for all doubtful accounts; the bank balances were confirmed by certificates, and we have taken all reasonable precautions to satisfy ourselves that all liabilities as at 30th September, 1925, are included in the Balance Sheet.

And we certify that the annexed Balance Sheet is drawn up so as to show the true financial position of the Company as of that date and the results from the operations for the year ending 30th September, 1925, according to the best of our information and the explanations given to us and as shown by the books of the Company.

PRICE, WATERHOUSE & CO.,  
Auditors.
